SPECIBIO

A Celltech Discovery Solutions Brand

KRISHGEN BioSystems

OUR REAGENTS, YOUR RESEARCH

Disease-State & Custom Biofluids

50+ confirmed disease states with comprehensive clinical metadata, or a collection built around your exact protocol.

Therapeutic Areas We Can Scope

- Oncology
- Cardiovascular
- Metabolic & diabetes
- Infectious disease
- Autoimmune & inflammatory
- Neurology
- Respiratory
- Renal & hepatic

Examples only; ask for current availability.

Custom Collection Capabilities

- Exact donor demographics and inclusion or exclusion criteria
- Confirmed disease states with verified clinical data
- Bespoke processing and anticoagulant selection
- Longitudinal sampling from matched donors
- Paired samples: pre/post treatment, disease/healthy
- Scalable volumes, pilot quantities to large lots

How a Custom Request Works

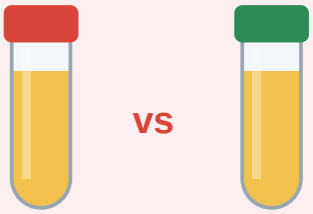

From Brief to Delivery

1. **Request** — Reviewed by our scientific team
2. **Feasibility** — Donor availability and protocol confirmed
3. **Proposal** — Detailed proposal within 24 to 48 hours
4. **Collection** — Initiated on your approval
5. **Delivery** — Shipped with full CoA documentation

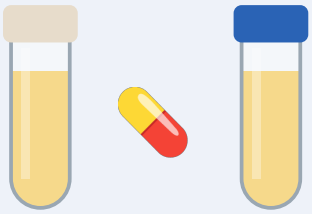

⏱ **Response within 1 business day for all custom requests**

Study Designs We Support

Disease vs healthy

Pre vs post treatment

Longitudinal time points

What to Include in Your Brief

1. Sample type and volume per donor
2. Condition, staging or diagnostic criteria
3. Donor age, gender and demographics
4. Anticoagulant and processing needs
5. Number of donors and time points
6. Timeline and intended use of data

Send us your study brief
